

Increase Driver Productivity & Communication

Would you like your roadside assistance staff serving members in the most efficient way possible?

Thanks to the **AXIS ERS (Emergency Road Service) MobilePlus** app for iOS and Android devices, your team can significantly boost their productivity and improve member satisfaction.

Simplify Task Management

Empower drivers to manage their daily tasks using an intuitive visual interface on their mobile device.

Automate Notifications

Automatically notify drivers when their device receives calls or messages to ensure they never miss a request.

Process Sales on the Go

Get drivers to process secure point-of-sale transactions for battery and accessory sales no matter where they are.

Track Everything on a Map

Allow contractors and dispatchers to track drivers, breakdown locations and tow destinations on an interactive map.

Streamline Dispatching

Enable drivers to broadcast their services, location and status (e.g. on a break), so dispatchers can assign new calls to the right driver.

Manage Quoted Delays

Ensure quoted delays are kept current in the service areas managed by contractors to ensure everyone is on the same page.

Stay Informed

Get a complete view of your ERS operations, so you can focus your attention on the more problematic areas, and in turn, increase your revenue.
